

KFS 3M

Qualities

KFS 3M is a highly versatile form of security fencing. It stands at the forefront of all of the products offered by Kane Fencing due to its cost-effective and very useful nature. The finished structure is extremely strong, long lasting and resistant to the elements.

The KFS 3M structure has a 'V' beam outline pressed horizontally into each mesh panel.

Installation is quick and simple due to the workable nature of the 3M.

All KFS 3M products come coated in a galvanised substrate and polyester powder coating. The fencing is available for specification in a range of industry standard RAL colours.

Usage

- ◆ Retail Security
- ◆ Business Parks
- ◆ School & Universities
- ◆ Wildlife Parks
